Professional Summary

Computer Science undergraduate specializing in full-stack web development using the MERN stack (MongoDB, Express.js, React, Node.js). Skilled in architecting RESTful APIs, building real-time applications with Socket.io, and managing complex frontend state using Redux Toolkit. Experienced in integrating cloud services, JWT authentication workflows, and optimizing database performance.

Education

Jagannath University
Bachelor of Technology (B.Tech) in Computer Science

Jaipur, India
Jul 2023 – Expected Jul 2027

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
- **Frontend:** React.js, Redux Toolkit, Tailwind CSS, Context API, Bootstrap
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets (Socket.io)
- **Databases & Cloud:** MongoDB, Mongoose ORM, PostgreSQL, Clouinary, IBM Cloud
- **Tools & Utilities:** Git, GitHub, Postman, Vercel, Render, NPM, VS Code

Experience

Edunet Foundation (AICTE × IBM SkillsBuild)
Artificial Intelligence Intern

Remote
May 11, 2026 – Jun 21, 2026 | [\[Verify Certificate\]](#)

- Completed a 6-week intensive training program centered on AI models, cloud workflows, and system deployment.
- Developed full-stack web interfaces integrated with backend AI services for real-time data processing.
- Implemented API endpoint handlers and connected client-side components to IBM cloud infrastructure.

Edunet Foundation (AICTE × IBM SkillsBuild)
Emerging Technologies Intern

Remote
May 15, 2026 – Jun 12, 2026 | [\[Verify Certificate\]](#)

- Engineered a capstone project utilizing IBM Cloud, IBM BOB, and Agentic AI workflow models.
- Developed RESTful microservices with automated request routing, input validation, and structured error logging.
- Participated in technical reviews and verified cloud deployment pipelines for seamless execution.

Projects

ShopEase – Full-Stack E-Commerce Platform | *React, Node.js, Express, MongoDB, Redux Toolkit*

- Engineered a full-stack e-commerce web application with product search, category filtering, and shopping cart persistence.
- Implemented secure user authentication using **JWT** alongside bcrypt password hashing middleware.
- Integrated **Razorpay API** for processing secure checkout payments and handling server-side webhooks.

TaskSphere – Project Management & Task Tracker | *React, Node.js, Express, MongoDB, Tailwind CSS*

- Built a collaborative task tracking application enabling multi-user creation, categorization, and status tracking.
- Designed relational **MongoDB schemas** using Mongoose ORM with schema validation and query optimization.
- Developed RESTful Express.js API endpoints with standardized response formatting and error handling.

QuickChat – Real-Time Messaging Application | *React, Node.js, Express, MongoDB, Socket.io*

- Constructed a real-time messaging application utilizing **Socket.io** for low-latency bi-directional communication.
- Implemented online/offline user status indicators, chat history persistence in MongoDB, and active channel switching.
- Designed a responsive UI using **Tailwind CSS** optimized for desktop and mobile devices.
